EDUCATION

Beni Suef University

Bachelor's degree in computer science and Artificial Intelligence
Cyber Security Department

October 2022 – October 2026
Beni Suef, Egypt

- Current GPA 3.27

PROFESSIONAL EXPERIENCE

DEPI (6 Months)

Mobile Developer Intern

- **Java Programming Fundamentals & OOP:** Acquired foundational knowledge in Java programming and object-oriented principles, laying the groundwork for advanced mobile development.
- **Kotlin Programming:** Developed proficiency in Kotlin, focusing on modern practices for efficient Android application development.
- **Android Application Development:** Gained hands-on experience in building and deploying Android applications, including managing app lifecycle and optimizing performance.
- **Android Security Essentials:** Implemented security measures to protect user data and ensure application integrity, including secure coding practices and vulnerability assessments.
- **Flutter Application Development:** Learned to develop cross-platform applications using Flutter, enabling seamless app creation for both iOS and Android

Additional Skills and Experiences Acquired During Internship:

- **Technical Skills:** Enhanced expertise in mobile development tools and frameworks, including Android Studio and Flutter.
- **English Proficiency:** Improved technical communication skills in English, aiding in clear documentation and effective team collaboration.
- **Soft Skills:** Developed problem-solving abilities, teamwork, and project management skills, contributing to successful project outcomes.
- **Freelance Projects:** Applied internship-acquired skills to freelance projects, gaining practical experience and applying knowledge in real-world scenarios.

TECHNICAL SKILLS

Dart • Flutter • Java • Kotlin • Object Oriented Programming • Algorithms • Data Structure • Firebase • State Management (Cubit-Provider) • Restful API (Dio- http) • Architecture Pattern (MVVM) • Git Hub • Responsive UI • Adaptive UI

SOFT SKILLS

Problem Solving • Analytical Thinking • Teamwork • Self-Learning • Effective Communication

PROJECTS

Tasawq (Ecommerce App)

The "Tasawq" project is a Flutter-based mobile application designed to enhance the online shopping experience for supermarket products. It earned recognition as one of the top 20 projects in the Google Middle East competition.

- **Core Features:**

- **E-Commerce Functionality:** Enables seamless product browsing, shopping cart management, and secure checkout.
 - **State Management:** Utilizes Cupit for efficient state management, ensuring smooth and responsive user interactions.
 - **API Integration:** Employs Dio for handling API requests, enabling robust data communication between the app and backend services.
 - **Testing and Development:** Utilizes Postman for API testing and validation, ensuring reliable and accurate data exchanges.
 - **Interactive Maps:** Integrates Google Maps API to provide users with a store locator feature for finding nearby supermarket branches.
 - **User Experience:** Follows Material Design principles to ensure a visually appealing and intuitive user interface
-

job_Scout (Job Finder App)

The "Job Scout" project is a Flutter-based mobile application designed to streamline the job search process for users by connecting them with suitable opportunities. It was developed with a focus on simplicity, scalability, and real-world usability.

- **Core Features:**

- **Job Search Functionality:** Allows users to explore job listings with filtering and search options, making it easy to find relevant opportunities.
 - **State Management:** Utilizes Bloc for predictable and scalable state management, ensuring smooth navigation and responsive UI updates.
 - **API Integration:** Employs Dio for efficient API communication, enabling real-time fetching and updating of job data from backend services.
 - **Authentication:** Implements secure user login and registration using Firebase Authentication.
 - **Data Storage:** Integrates Firebase Firestore for managing user profiles, job applications, and saved jobs.
 - **Interactive UI:** Follows Material Design guidelines for a clean, user-friendly interface that enhances user experience.
 - **Testing & Development:** Tested APIs and app features using Postman to ensure accuracy and reliability.
 - **Scalability:** Designed with modular architecture, making it easier to maintain and extend new features in future releases.
-

(BMI APP)

The "BMI App" is a Flutter-based mobile application designed to calculate and track Body Mass Index (BMI) for users.

- **Key Features:**

- **BMI Calculation:** Allows users to input height and weight to calculate and display their BMI.
- **User Interface:** Offers a simple and intuitive design for easy interaction.
- **State Management:** Utilizes Cupit to manage app state and ensure smooth user experience.
- **Local Storage:** Stores user data and BMI history for reference and tracking.

- **API Integration (Optional):** Can incorporate APIs for additional health-related features if needed.
-

Whats App

Flutter WhatsApp Clone Project (Mobile) Explore Flutter WhatsApp Clone, an educational repository aiming to replicate WhatsApp's messaging experience on mobile using Flutter. Features secure authentication, a prototype chat interface, and responsive design for various mobile devices.

Technologies: Flutter, Dart, Firebase Authentication, Provider

Languages

- **Arabic (Egyptian & MSA)** – Native
- **English** – Fluent
